Salesforce Administrator & Platform Specialist

Pittsburgh, PA • (815) 354-3692 • hillstromgeorge@gmail.com • [linkedin.com/in/george-hillstrom](https://www.linkedin.com/in/george-hillstrom) • github.com/ghillstr

PROFESSIONAL SUMMARY

Salesforce Certified Administrator with 5+ years of IT experience administering enterprise Salesforce environments across Sales Cloud, Service Cloud, and Experience Cloud. Proven ability to translate complex business requirements into scalable platform solutions using Flows, custom objects, dynamic Lightning pages, and robust security models. Experienced working in regulated, data-sensitive environments (banking/financial services) with strong instincts for data integrity, governance, and compliance. Comfortable leveraging AI tools—including large language models like Claude—to accelerate development, documentation, and solution design. Actively pursuing Salesforce Platform App Builder certification to deepen technical delivery capabilities.

SALESFORCE SKILLS & CORE COMPETENCIES

Salesforce Clouds:	Sales Cloud, Service Cloud, Experience Cloud, Financial Services Cloud (working knowledge)
Automation:	Flow Builder (Screen Flows, Record-Triggered Flows, Scheduled Flows), Action Plans, Validation Rules
Platform Config:	Custom Objects, Custom Metadata, Fields, Formulas, Dynamic Lightning Pages, Reports & Dashboards
Security & Gov.:	Profiles, Permission Sets, Object/Field-Level Security, Sharing Rules, Data Integrity & Compliance
Agile/SAFe:	SAFe Agile, Jira, Confluence — project documentation, sprint ceremonies, cross-functional delivery
Integrations:	DocuSign, HubSpot, SharePoint, MuleSoft (awareness), RESTful APIs
AI Tools:	Claude (Anthropic), LLM-assisted development & documentation, Agentforce awareness, Azure AI Foundry
Data & Dev:	SOQL, Data Loader, Workbench, SQL, Java, Python, Git, Change Management
IT & Monitoring:	ServiceNow, Splunk, Dynatrace, Log Scale, Docker, Kubernetes

WORK EXPERIENCE

PNC Bank

Pittsburgh, PA

System Reliability & Support Specialist Sr. (Salesforce Admin Focus)

10/2024 – Present

- Administer and maintain the Salesforce platform supporting 150,000+ users across consumer lending applications within a regulated financial services environment, ensuring system health, uptime, data integrity, and security compliance.
- Configure and customize Salesforce using custom objects, custom metadata, fields, formulas, dynamic Lightning pages, record types, page layouts, and action plans to support complex and evolving business requirements—directly aligning with Financial Services Cloud best practices.
- Design and maintain Flows including Screen Flows, Record-Triggered Flows, and Scheduled Flows with assignment elements, decision logic, and automation to streamline CRM operations and reduce manual effort.
- Manage Salesforce security model including profiles, permission sets, object/field-level security, and sharing rules to enforce proper data access and governance in a data-sensitive enterprise environment.
- Partner with business stakeholders to gather, analyze, and translate complex requirements into scalable Salesforce configurations and process improvements, serving as an SME on platform capabilities.
- Troubleshoot and support integrations with third-party systems (DocuSign, HubSpot, SharePoint), lead root cause analysis on incidents, and recommend improvements to minimize recurrence.
- Collaborate with cross-functional project teams and third-party consultants on design, testing, and deployment of enhancements following SAFe Agile practices and change management standards.
- Maintain clear system documentation and deliver training/support to end users, improving platform adoption and reducing ticket volume; mentor junior team members on Salesforce processes.
- Leverage AI tools including LLMs (Claude) to accelerate documentation, solution design, and workflow prototyping—reducing iteration cycles and improving delivery speed.

System Reliability & Support Specialist (Salesforce Admin)

06/2022 – 10/2024

- Provided production support and incident management for the Salesforce platform including user troubleshooting, system monitoring, and triaging break/fix issues under enterprise SLAs.
- Led initiatives to streamline incident resolution workflows, improving system reliability and user satisfaction without additional resource allocation.
- Standardized documentation processes, significantly reducing incident resolution time and improving team efficiency.

across the support organization.

PNC / TekSystems

Infrastructure Support Engineer

Pittsburgh, PA
11/2021 – 06/2022

- Designed and supported infrastructure technology solutions aligned with business objectives, collaborating with engineers and solution architects.
- Analyzed customer technology needs and delivered ongoing technical support and system integration assistance across enterprise platforms.

University of Pittsburgh

IT Support Specialist

Pittsburgh, PA
08/2021 – 11/2021

- Executed hardware and software installations, improving system performance and end-user experience across university departments.
- Proactively identified recurring technical issues and drove improvements in system reliability and user support processes.
